Overzicht van de laatste wijziging(en)

versie	datum	toelichting
3.64	24-7-2024	Aanpassing eisen voor klare sierplanten van <i>Capsicum</i> verpakt en bestemd voor directe verkoop aan de eindgebruiker
3.63	10-7-2024	Per 1 augustus is vaker een model 20 verplicht. Per 1 augustus weer controleren op <i>Xylella</i> vrije landen/gebieden/bedrijven/percelen (B2, B3, B4 en B5)
3.62	3-7-2024	Aanpassingen m.b.t. <i>Candidatus Phytoplasma 'prunorum'</i> (item 77)

Landenoverzicht exporteisen Sierteelt - Verenigd Koninkrijk*

VERENIGD KONINKRIJK* (GB)	Certificaat export	Certificaat re-export	Taal	Grondeis	Invoervergunning
	1	20 of 1**	E	-	nee

* Uitgezonderd Noord Ierland, dit landsdeel blijft fytosanitair EU.

Deze uitzondering geldt alleen voor rechtstreekse zendingen door Groot Brittannië onder douane verband.

** I.p.v. model 20 mag model 1 gebruikt worden indien het product is vrij gegeven voor het EU-verkeer (d.m.v. douane-inklaring); in dat geval de origine achter het betreffende product vermelden. Voorgaande is niet van toepassing indien specifieke informatie (bijschrijving, uitgevoerde behandeling) van het import FC nodig is, om aan de eisen van GB te voldoen. Ingangsdatum; 1 augustus 2024.

Algemene eisen

Certificaat vereist voor

Bloemkwekerijproducten, m.u.v. droogbloemen, snijbloemen¹ en siertakken¹
Boomkwekerijproducten

Inspectie vereist voor

Bloemkwekerijproducten, m.u.v. droogbloemen, snijbloemen¹ en siertakken¹
Boomkwekerijproducten

¹ Niet uitgezonderd zijn:

- Siertakken groter dan 3 meter van naaldbomen, zoals genoemd in de items 44, 52, 53 en 54 onder Certificeringseisen
- Snijbloemen en siertakken van niet-EU-origine, die niet zijn vrijgegeven voor het EU-verkeer (d.m.v. douane-inklaring)

¹ Niet meer uitgezonderd per 31-1-2024 zijn de volgende producten uit de EU, Liechtenstein en Zwitserland:

- Siertakken van naaldbomen (een kerstboom zonder kluit is een siertak)
- Levende delen, zoals snijbloemen en siertakken, van *Prunus*, *Solanum lycopersicum*, *Solanum melongena* en *Zea mays*.
- Snijbloemen van *Orchidaceae*, *Chrysanthemum* (syn. *Dendranthema*), *Dianthus*, *Gypsophila* en *Solidago*

¹ Niet meer uitgezonderd per 30-4-2024 zijn de volgende producten:

- Levende delen, zoals snijbloemen en siertakken, van *Ipomoea* en *Solanaceae* (Zie register Plantenfamilies)

Voor (nog) niet certificaat- en inspectieplichtige producten zijn de vermelde bijschrijvingen (nog) niet van toepassing.

Landenoverzicht exporteisen Sierteelt.

- Nederlands voortkweekingsmateriaal van Ficus moet van een bedrijf komen dat gedurende de laatste 9 weken voor export, elke 3 weken is geïnspecteerd en vrij bevonden van Bemisia tabaci. Dit moet aantoonbaar worden gemaakt met RKT's.
- Planten bestemd voor opplant, van Viburnum, Camellia en Rhododendron, m.u.v. R. simsii, moeten afkomstig zijn van een bedrijf dat tijdens twee veldinspecties door Naktuinbouw vrij is bevonden van Phytophthora ramorum. Bedrijven uit het register 'Overzicht leveranciers waardplanten P. ramorum Verenigd Koninkrijk', voldoen hier aan.
- Scherp inspecteren op witte vlieg; Bemisia tabaci, m.n. in Begonia, Ajuga, Crossandra, Hibiscus, Nerium oleander, Helianthus, Capsicum, Euphorbia pulcherrima (syn. Poinsettia), Mandevilla (syn. Dipladenia) en Solanum pseudocapsicum.
- Planten bestemd voor opplant van Capsicum, m.u.v. sierplanten die op basis van hun verpakking of ontwikkeling, bestemd zijn voor rechtstreekse verkoop aan eindgebruikers, die niet betrokken zijn bij professionele plantenproductie, moeten zijn geteeld uit zaad:
 - afkomstig uit een gebied, ingesteld door de NPPO, in overeenstemming met ISPM 4, dat vrij is van Pepper chat fruit viroid [NL is vrij], of

Landenoverzicht exporteisen Sierteelt.

Land: **Verenigd Koninkrijk**

-
- afkomstig van planten die gedurende hun volledige teelt zijn gegroeid op een bedrijf, ingesteld door de NPPO, in overeenstemming met ISPM 10, dat vrij is van Pepper chat fruit viroid, op basis van officiële inspecties en zo nodig toetsen, of
 - dat officieel is getoetst op Pepper chat fruit viroid op een statistisch gebaseerd monster in overeenstemming met ISPM 31, en met een geschikte methode is vrij bevonden van deze plaag.
 - Planten bestemd voor opplant van *Solanum lycopersicum* moeten zijn geteeld uit zaad:
 - afkomstig uit een gebied, ingesteld door de NPPO, in overeenstemming met ISPM 4, dat vrij is van *Citrus exocortis* viroid, *Columnea latent* viroid, Pepper chat fruit viroid en *Tomato planta macho* viroid [NL is vrij van Pepper chat fruit viroid en *Tomato planta macho* viroid], of
 - afkomstig van planten die gedurende hun volledige teelt zijn gegroeid op een bedrijf, ingesteld door de NPPO, in overeenstemming met ISPM 10, dat vrij is van *Citrus exocortis* viroid, *Columnea latent* viroid, Pepper chat fruit viroid en *Tomato planta macho* viroid, op basis van officiële inspecties en zo nodig toetsen, of
 - dat officieel is getoetst op *Citrus exocortis* viroid, *Columnea latent* viroid, Pepper chat fruit viroid en *Tomato planta macho* viroid op een statistisch gebaseerd monster in overeenstemming met ISPM 31, en met een geschikte methode is vrij bevonden van deze plaag.

* Voor geënte planten geldt dit voor beide delen van de plant.

Eisen met betrekking tot monsternamen

- Elke partij *Polygala myrtifolia* moet worden bemonsterd en onderzocht op *Xylella fastidiosa*. De uitslag mag op het moment van export maximaal 28 dagen oud zijn.
- Planten van *Lavandula* (m.u.v. *L. dentata*) en *Salvia rosmarinus* (syn. *Rosmarinus officinalis*) moeten afkomstig zijn van een perceel dat is bemonsterd en onderzocht op *Xylella fastidiosa*. Percelen van bedrijven vermeld in het register "Overzicht leveranciers waardplanten *Xylella fastidiosa* naar het Verenigd Koninkrijk" voldoen aan deze eis. Percelen van bedrijven die niet in het register staan mogen ook vlak voor export worden bemonsterd om aan de eis te voldoen.
- Planten afkomstig uit de EU van *Cryptocoryne*, *Hygrophila* en *Vallisneria* moeten worden bemonsterd en onderzocht op *Hirschmanniella* spp. m.u.v. *H. behningi*, *H. gracilis*, *H. halophila*, *H. loofi* en *H. zostericola*.
Zie register Verplichte monsternamen bij export en register Bemonsteren en verpakken. Voor bemonsterde vrije bedrijven: Zie register Bedrijven met planten vrij van *Radopholus similis*, *Heterodera fici*, *Cactodera cacti* en *Hirschmanniella*.

Certificeringseisen

Cyclamen persicum – CITES

Alle soorten *Cyclamen*, m.u.v. *Cyclamen persicum*, moeten zijn voorzien van een CITES-uitvoervergunning (af te geven door het CITES-bureau van RVO). Om CITES-problemen met planten van *Cyclamen persicum* te voorkomen, de soortnaam (= *persicum*) ook vermelden op het certificaat.

Dypsis en Tillandsia – CITES

Enkele soorten *Dypsis* en *Tillandsia* moeten zijn voorzien van een CITES-uitvoervergunning (af te geven door het CITES-bureau van RVO). Om problemen met planten van *Dypsis* en *Tillandsia* te voorkomen, de soortnaam ook vermelden op het certificaat.

Bijschrijving

Let op, Bijschrijving kan uit meerdere onderdelen bestaan.

Potplanten behoren tot planten bestemd voor opplant.

Voor register 'lijst kruidachtige planten', zie register: Kruidachtige planten

Landenoverzicht exporteisen Sierteelt.
Land: **Verenigd Koninkrijk**

Indien een bijschrijving vermeld moet worden, dan moet deze voluit worden vermeld (verwijzing m.b.v. cijfer/lettercombinaties is niet toegestaan).

PEC = Pre-exportcertificaat (EU)

Paspoort = EU Plantenpaspoort. Code bij 'D' geeft land van oorsprong aan.

Planten bestemd voor opplant = Plants for planting = planten die bedoeld zijn om geplant te blijven, te worden uitgeplant of opnieuw te worden geplant.

EU / niet-EU, met EU wordt hier bedoeld: de 27 lidstaten + Liechtenstein en Zwitserland

RKT = Rapportage Keuringstoezicht (Naktuinbouw document)

'Eis conform EU', dekking is EU Plantenpaspoort of een import FC, een PEC is niet nodig.

Zie 'Common register on absent organisms in EU' voor EU landen vrij van betreffend(e) organisme(s). Voor organisme/land combinaties met 'no' is geen PEC nodig. Tevens kan het register 'Peststatus annex II-A-organismen (niet NL)' hiervoor worden gebruikt.

De naam van het gebied - / De naam van de productieplaats moet worden vermeld in het vak "Additional declaration". In e-CertNL wordt dit vermeld in het veld 'naam kweker' of de productomschrijving.

De bijschrijving moet beginnen met een verwijzing naar de wettekst: The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A (+ item nummer en volledige tekst)

	<p>The following additional requirements must be complied with.</p> <p>(1) The annual lists of the registered nurseries must be made available to the national plant protection organisation of the United Kingdom by 1st March each year. Those lists must include the number of plants grown in each of these nurseries which are deemed suitable for dispatch to Great Britain under the conditions laid down.</p> <p>(2) The total number of plants dispatched to Great Britain must not exceed the quantities which have been approved by the national plant protection organisation of the United Kingdom in advance, having regard to the availability of quarantine facilities.</p> <p>(3) In the case of plants of <i>Juniperus</i>, the plants may only be imported into Great Britain during the period beginning on 1st November each year and ending on 31st March the following year.</p> <p>(4) Any detection of the pests specified in points (c) to (f) in the inspections carried out pursuant to those points must be officially recorded, and the records must be kept available to the national plant protection organisation of the United Kingdom, upon its request.</p> <p>(5) The detection of any pests which are specified in points (c) to (f) disqualifies the nursery from the status of officially registered nursery and from exporting the plants specified in column 1 to Great Britain. The national plant protection organisation of the United Kingdom must be informed immediately of such detection. In such case, the registration can be renewed only in the following year.</p> <p>(6) Following their import into Great Britain, the plants must be subject, before their release, to official post-entry detention in a confinement facility or quarantine station of not less than three months of active growth in the case of <i>Pinus L.</i> and <i>Chamaecyparis</i> plants, and for a period including the active growth season from 1st April until 30th June in the case of <i>Juniperus L.</i> plants, and must have been found to be free, during this post-entry detention, from any pests listed in points (c) to (f). Particular attention must be given by the competent authority or the professional operators to preserve for each plant the marking or traceability code referred to in point (g)(iv).</p> <p>(7) Any lot in which plants have not been found to be free, during the post-entry detention, from the pests of concern must be immediately destroyed under official supervision.</p> <p>(8) If any contamination by the pests of concern is confirmed during the post-entry detention period, the relevant nursery in Japan must be treated as disqualified from its status as an officially registered nursery. The national plant protection organisation</p>
